PROFESSIONAL SUMMARY

AI/ML Engineer specializing in production-ready RAG pipelines and autonomous agents. Core stack: Node.js, PyTorch, TensorFlow, MLOps, Fast-API. Focused on deploying and scaling foundation models into resilient, automated system workflows.

SKILLS

- Python
- JavaScript
- DevOps
- Machine Learning
- Deep Learning
- MLOps
- TensorFlow
- PyTorch
- FastAPI
- HTML5
- CSS
- Node.js
- Express.js
- MySQL
- Docker
- MongoDB
- PostgreSQL
- C
- Java

EMPLOYMENT HISTORY

Automation and AI Intern, Thoughmatrix.ai

Aug 2026 — Present

Pune,Maharashtra

Backend Developer Intern, Astrolekh

May 2026 — Jul 2026

Mumbai, Maharashta

- Built lightweight, high-performance RESTful APIs in JavaScript leveraging the Hono.js framework.
- Implemented secure authentication and authorization middleware to protect sensitive application routes.
- Developed modular CRUD endpoints optimized for efficient data retrieval, state mutation, and database updates.
- Structured robust request validation and error-handling pipelines to ensure API reliability and data integrity.

Research Intern(AI/ML), Symbiosis Centre for Applied Artificial Intelligence(SCAAI)

Jul 2025 — 2026

Pune,Maharashtra

Assisted in developing NyayaBot, a RAG-based legal chatbot to explain government schemes, utilizing Meta-Llama3.1 and ChromaDB to index documents, reducing retrieval time compared to manual search.

Designed a real-time voice command feature with Fast-API WebSocket, with <200ms latency, ensuring seamless interaction between React and Fast-API.

Integrated Google Speech Recognition to transcribe user audio queries in real-time, feeding text into the chatbot’s query engine with ~95% accuracy.

Technical Head, CodeXSIT

Oct 2024 — Present

Pune,Maharashtra

Facilitated and conducted workshops on :

1. Machine Learning (Supervised & Unsupervised)
2. Deep Learning (Neural Networks, LLMs, Agentic AI)
3. DevOps and MLOps(Docker, AWS, GitHub Actions, Cloudflare Workers & Pages)

Organized Technical Events in Symbiosis Institute of Technology During Tech-Fest 2025 and 2026.

EDUCATION

Jul 2024 — Present
B.Tech in Artificial Intelligence and Machine Learning,
Symbiosis Institute of Technology — Pune, Maharashtra

Jan 2022 — Jan 2024
Senior Secondary (PCM + CS), Delhi Public School, Vasant Kunj — New Delhi

PROJECTS

Pulse AI

- Constructed a hybrid AI agent to execute shell commands via natural language, using an open-source model fallback chain for complex multimodal reasoning.
- Implemented an autonomous "Think-Act-Observe" agentic loop to decompose terminal tasks, achieving a 90% autonomous error-handling success rate.
- Integrated multimodal voice interaction supported by context-aware history management.

Code-Sentinel (AI-Code-Reviewer)

- Developed an AI engineering agent featuring an ingestion engine that uses AST parsing, symbol indexing, and dependency graphs to analyze complex codebases.
- Built a hybrid retrieval pipeline using vector embeddings and ChromaDB to power automated codebase QA, proactive code reviews, and dynamic documentation.
- Delivered end-to-end functionality through a streamlined command-line interface.

SBI-Saarthi

- Built a multi-agent financial assistance platform on WhatsApp to automate banking workflows, KYC processing, credit underwriting, and fraud risk assessment.
- Implemented a centralized orchestrator with an event bus to coordinate specialized AI task agents.
- Designed a dual-database architecture using PostgreSQL and MongoDB to securely manage customer profiles, audit logs, and messaging states.
- Integrated external compliance tools, including UIDAI (Aadhaar) and PAN verification, to enable state-machine-driven onboarding.
